TRAINING DAY

OFF-ROAD FUNDAMENTALS

Join WC4x4A for a hands-on training session designed to build confidence and skill for tackling any terrain. This class covers essential off-road driving knowledge every 4×4 enthusiast needs.

DIFFERENTIAL OPERATION

Understand open, limited-slip, and locking differentials — when to use each and why it matters on the trail.

4HI & 4LO OPERATION

Learn the real-world difference between four-high and four-low range, engagement procedures, and terrain selection.

LOCKER USE

Master front and rear differential lockers — proper engagement, terrain conditions, and common mistakes to avoid.

RECOVERY OPERATIONS

Hands-on recovery techniques: hi-lift jacks, kinetic rope, winching fundamentals, and safe rigging practices.
